Professional Summary

Frontend Developer with experience delivering React.js applications across real-world workflows. Strong ability to translate requirements into responsive interfaces, improve UI performance, and integrate scalable REST APIs. Comfortable collaborating in fast-paced environments while shipping maintainable, production-ready features.

Technical Skills

- **Frontend Technologies:** HTML5, CSS3, JavaScript (ES6+), React.js, REST APIs, Axios, Fetch
- **UI & Styling:** Tailwind CSS, Material-UI, Flexbox, CSS Grid
- **State Management:** React Hooks, Context API, Redux
- **Development Tools:** Git, GitHub, NPM, VS Code
- **Deployment Platforms:** Netlify, Vercel, CI/CD fundamentals

Experience

Frontend Developer Intern

Navodita Infotech

Aug 2025 – Sep 2025

- Delivered six responsive React.js screens using Material-UI, improving layout consistency and reducing UI rework.
- Integrated more than ten REST API endpoints to support dynamic content, authentication flows, and data-driven components.
- Reduced initial page load time by nearly 25% through optimized React Hooks, lazy loading, and component reuse.
- Contributed to two complete applications, including a News platform and a Spotify-style UI, deployed for internal evaluation.

Projects

Color Palette Generator <https://color-pallate.netlify.app/>

- Built an interactive tool generating over 1,000 unique color combinations using React.js and external APIs.
- Enabled real-time palette updates and copy-to-clipboard functionality, improving usability and interaction speed.
- Allowed users to generate palettes by selecting images via API, uploading local images, or providing image URLs, with options to download extracted images and corresponding color codes.
- Modularized UI logic into reusable components, reducing future feature development effort by an estimated 40%.

ServEase – Service Booking Platform

- Built a responsive local services marketplace connecting users with service providers using React.js, Tailwind CSS, and Ant Design.
- Designed a multi-step service provider onboarding flow with step-wise validation, file uploads, category selection, and smooth UI transitions.
- Managed dynamic frontend state to display newly onboarded providers as real-time service cards, enabling rapid iteration without backend dependency.
- Set up a scalable backend foundation using Node.js and Express.js to support authentication and future RESTful API integrations.

Education

B.Tech, CSE — CGPA: 8.1

Galgotias University, Greater Noida

2021 – 2024

Diploma, CS — Score: 84

Government Girls Polytechnic, Moradabad

2018 – 2021

Class X & XII — X: 80 — XII: 71

R.M.V.N.G. IC (UP Board), Bijnor

2016 – 2018

Certifications

- MERN Stack Certification — 30Days Coding
- Web Development Program — Internshala
